## **Maureen McHugh named Executive Director At DuPage County Health Department**

The DuPage County Board of Health on Thursday night named Maureen McHugh the new executive director at the DuPage County Health Department. McHugh had been serving as interim executive director since November, 2005.

Dr. Lanny Wilson, vice president of the board, said a letter from the Illinois Department of Public Health recently had been received stating that McHugh met all qualifying requirements to be a public health administrator.

Wilson said the search would be halted for a new executive director. A motion to remove “interim” from McHugh’s title was made and that was unanimously approved by the board.
