Daily COVID-19 Case Counts* for DuPage County

*Data are provisional as of 11:00 a.m. 3/25/2020 and subject to change.

Coronavirus Disease 2019 (COVID-19) Case Counts* in DuPage County, 2020	
Total cases in DuPage County residents	Total long-term care facility outbreak-associated cases
134 (41 outbreak-associated** and 93 non-outbreak-associated cases), including 1 death	47 (33 residents and 14 staff), including 1 death

*Data are provisional as of 11:00 a.m. 3/25/2020 and subject to change.

**Outbreak-associated cases are linked to a congregate setting or large gathering.

In DuPage County, there are 28 additional confirmed cases of coronavirus disease 2019 (COVID-19) since yesterday. Since cases are identified by the county of residence, not all 47 of the cases at the LTCF are counted in the DuPage County case count. In DuPage County, there are now 134 confirmed cases of COVID-19, including 40 DuPage County residents associated with the LTCF.

DCHD reminds everyone that nursing homes, assisted living facilities and other long-term care facilities have the highest risk populations due to their age and underlying medical conditions.

DCHD continues to discourage testing for individuals who are mildly or not sick at all. If you are sick, please stay home except to get medical care.

Across Illinois, the age of cases ranges from younger than one to 99 years. The number of cases in DuPage County as well as the most up-to-date information can be found on the DCHD website, www.dupagehealth.org/covid19.

The number of COVID-19 cases being reported continues to rise, partly because of the increase in testing by commercial and hospital laboratories. Because testing is becoming more available in these labs, IDPH will prioritize testing for our most severely ill and at-risk populations, such as hospitalized patients with severe acute lower respiratory illness and those who live and work in nursing homes and other congregate facilities.
