Daily COVID-19 Case Counts* for DuPage County

*Data are provisional as of 11:00 a.m. 3/28/2020 and subject to change.

Coronavirus Disease 2019 (COVID-19) Case Counts* in DuPage County, 2020
Total cases in DuPage County residents
204 (49 outbreak-associated** and 155 non-outbreak-associated cases), including 6 deaths

*Data are provisional as of 11:00 a.m. 3/28/2020 and subject to change.

**Outbreak-associated cases are linked to a congregate setting (e.g., long-term care facilities, workplaces, schools) or large gathering (e.g., convention, concert).

In DuPage County, there are 5 additional confirmed cases of coronavirus disease 2019 (COVID-19) since yesterday. Among DuPage County residents, there are now 204 confirmed cases of COVID-19 including 6 deaths. To date, these deaths have occurred among patients older than 60 years of age.

DCHD reminds everyone that nursing homes, assisted living facilities and other long-term care facilities have the highest risk populations due to their age and underlying medical conditions.

DCHD continues to discourage testing for individuals who are mildly or not sick at all. If you are sick, please stay home except to get medical care.

Across Illinois, the age of cases ranges from younger than one to 99 years. The number of cases in DuPage County as well as the most up-to-date information can be found on the DCHD website, www.dupagehealth.org/covid19.

The number of COVID-19 cases and deaths being reported continues to rise, in part, due to the increase in testing by commercial and hospital laboratories, as well as the spread of the virus in the community. Because testing is becoming more available in these labs, IDPH will prioritize testing for our most severely ill and at-risk populations, such as hospitalized patients with severe acute lower respiratory illness and those who live and work in nursing homes and other congregate facilities.
