

STAY SAFE DUPAGE

QUARANTINE VS. ISOLATION

QUARANTINE

keeps someone who was in close contact with someone who has COVID-19 away from others.

... If you had close contact with a person who has COVID-19:

... Stay home until 14 days after your last contact.

... Check your temperature twice a day and watch for symptoms of COVID-19.

... If possible, stay away from people who are at higher-risk for getting very sick from COVID-19.

ISOLATION

keeps someone who is infected with the virus (those who are sick with COVID-19 and those with no symptoms) away from others who are not infected.

... If you are sick and think or know you have COVID-19:

Stay home until after:

- 10 days since symptoms first appeared
- at least 24 hours with no fever without fever-reducing medication **and**
- **Symptoms improved**

... If you tested positive for COVID-19 but do not have symptoms:

Stay home until after:

- 10 days have passed since your positive test.

... If you live with others, stay in a specific "sick room" or area and away from other people or animals, including pets. Use a **separate bathroom**, if available.
