Mayors and Managers Meeting Notes from 3.22.2021

DuPage County Representatives Participants: Dan Cronin, County Board Chairman, Sheryl Markay, Chief Policy and Program Officer; Joan Olson, Chief Communications Officer

DuPage County Health Department Participants: Karen Ayala, Executive Director; Rashmi Chugh, Medical Officer; Dennis Brennan, Legislative Manager; Chris Hoff, Director of Community Health Resources, Adam Forker, Director of Client Access, Penny Chanez, Executive Asst.

Purpose of the call today with Mayors and Managers is to address updated case counts, Community and business updates and guidance. DuPage County Health Department Deputy Incident Commander, Chris Hoff facilitated the meeting.

Director Karen Ayala shared that that participants would learn on today’s call of promising news of increased vaccine opportunities for DuPage County residents.

Comments for Board Chairman Dan Cronin and Board of Health President, Sam Tornatore both welcomed participants and shared that they are feeling positive that the County is heading in the right direction following the news of allocations of increased vaccine being distributed to DuPage County residents.

COVID-19 UPDATE DUPAGE COUNTY AND DASHBOARD REVIEW

The Health Department’s Medical Officer, Dr. Chugh provided updates focused on local levels of case activity.

- Total COVID-19 cases: 79,959 (confirmed cases:74,339/ probable cases: 5,620). Community transmission level remains at substantial.
- Total COVID-19-related deaths: 1,283 (confirmed deaths: 1,221/ probable deaths: 62). Data may be incomplete due to reporting lags.
- Positivity rate is at approximately 3.5% based on a seven-day rolling average.
- There is a slight uptick reported in the number of reported case activity in all age groups with an exception in those aged 80 years and older. Dr. Chugh stressed the need for everyone to continue with public health mitigation measures of proper hand hygiene, maintaining 6 feet physical distance, wearing a mask and obtaining a vaccine when it becomes available to each individual.
- Dr. Chugh shared information on COVID-19 variants which can be found at the following links: http://dph.illinois.gov/covid19/variants and https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/variant-surveillance/variant-info.html
COVID-19 Vaccine Update

Mr. Hoff provided a PowerPoint Presentation (a copy is included with the minutes) with updates on the Health Department’s COVID-19 vaccine response. Mr. Hoff shared the following key messages and highlights of the call.

- As of March 21, 2021, 130,335 DuPage County residents are considered fully vaccinated.
- As of March 21, 2021, 226,992 individuals have received at least one dose of COVID-19 vaccine.
- The allocation of doses is 23,490 for the week of March 22, 2021.
- DuPage County Health Department’s vaccine efforts continues to focus on the approximately 270,000 eligible individuals who are in the 1B group.
- As of March 21, 2021, 100,282 persons aged 65 and older received one dose of vaccine.
- As of March 21, 2021, 58,869 (38.1%) persons aged 65 and older are fully vaccinated.
- Once 70% of residents 65 and older statewide have received their first dose of the vaccine and no increase in COVID-19 metrics is recorded, the state could move into the Bridge Phase. Once 50% of residents 16 and older have received their first dose of the vaccine and no increase in COVID-19 metrics is recorded, the state could move into Phase 5.
- New State of Illinois supported sites are listed on the Illinois Department of Health’s (IDPH) website where individuals can seek vaccinations that are not located in DuPage County but available to DuPage residents.
- The State of Illinois has not heard how much Johnson and Johnson vaccine will be part of the allocations received from the Federal government for next week.
- Advocacy for more vaccine for DuPage County is still needed and participants were encouraged to help in this capacity if they can.
- The Health Department in cooperation with IDPH will begin offering additional vaccine at the community vaccination site located at the DuPage County Fairgrounds in Wheaton. This is the result of ongoing discussions between the State of Illinois, Chairman Cronin, President Tornatore, Director Ayala and others regarding the lack of vaccine equity coming to DuPage County. The site will continue to operate completely with the use of local staff. This additional allocation will allow for regularly allocated vaccine to be pushed to approved community partners. The site will be operational 5 days a week and fully functional. There will also be Saturday hours from 7:30AM -1:00PM.
- Information was shared on Illinois Restore Illinois plan and the recently released Bridge to 5 metrics as shared here: [https://dceoresources-ss-assets.s3.us-east-2.amazonaws.com/public/Restore-Illinois/A-Bridge-to-Phase-5.pdf](https://dceoresources-ss-assets.s3.us-east-2.amazonaws.com/public/Restore-Illinois/A-Bridge-to-Phase-5.pdf). State-wide metrics will determine how quickly this the next phase will occur.
- For business/employer-related questions, concerns, and resources, please email: COVID19Business@dupagehealth.org

There was no further discussion. Participants were encouraged to reach out with any other concerns or questions. Mr. Hoff concluded the call at 10:38AM.
Vaccine Distribution Update

March 22, 2021

www.dupagehealth.org/covid19
• As of March 21, 226,992 DuPage County residents have received at least one dose of COVID-19 vaccine.
• As of March 21, 130,335 DuPage County residents are fully vaccinated.

*Evaluation of vaccines for those under 16 is ongoing
Key messages Week of 3/21

- 270,000 people currently eligible in 1b and we are receiving 23,490 first doses this week
  - 17,640 first doses for DuPage County and 5,850 first doses for DuPage Community Vaccination Site
  - Projecting 6,350 first doses next week and 10,750 first doses the week of 4/5. Average supply over last 4 weeks has been 16,415 first doses per week.

- Last week we had 36 providers ready to go who requested more 55,000 doses. Our allocation from IDPH was for 16,070 first doses.

- This extreme mismatch in our capability vs our allocation is not something we have control over. We’ve tried to influence and would welcome your support.

- We are focused on assuring broad access to all eligible in 1b. DuPage County will expand to 1b Plus (16-64 years old with underlying medical condition) when supply significantly increases, demand in current group declines, or significant proportion (60-70%) of current group is vaccinated. 1b Plus expansion represents another 174,000 individuals in DuPage County.
Vaccine Distribution

- DuPage County’s allocation is 23,490 first doses this week
  - 357,327 doses administered (↑48,009 from 3/14)
  - 130,335 people fully immunized (↑17,150 from 3/14)
  - 14.04% of population fully immunized (↑1.85% from 3/14)

- IDPH dashboard to track vaccines administered
  (https://www.dph.illinois.gov/covid19/vaccinedata?county=DuPage)

- DCHD expanding number of sites who are receiving vaccines (Hospitals, Pharmacies, Clinics, DCHD)

### What is added by this summary?
- These data represent people who received COVID-19 vaccine at DuPage County vaccination sites, irrespective of residence. Slightly over half of vaccine recipients are DuPage County residents.
- Vaccination site types include clinic-private, clinic-public, community health center (federally qualified health center or FQHC), correctional facility, hospital, local health department, and pharmacy.
- Over 40% of vaccine recipients had race reported as "unknown," and approximately two-thirds of vaccine recipients had ethnicity reported as "unknown."
- Approximately 46% of first dose recipients are 65 years and older, and approximately 44% of second dose recipients are 65 years and older.
- Over 60% of vaccine recipients are female.
- Percent total COVID-19 vaccine doses administered by vaccination site type: Pharmacy – 40.4%, Hospital – 33.2%, Clinic (Private and Public) – 19.2%, Local Health Department – 7.9%, Community Health Center (FQHC) – 0.3%.

Vaccine Planning Goals and Progress

Weekly Vaccine Allocation Process

As of 1/15

DuPage County Health Department

Hospitals

IDPH allocation to DuPage County (weekly)

Outpatient Providers

DCHD allocation to vaccine providers (weekly)

Pharmacies

Vaccine Providers in DuPage County

Large employers

Federal allocation to Illinois (weekly)

Federally Qualified Healthcare Centers (FQHCs)

As of 1/15
• Social Vulnerability Index (SVI) indicates the relative vulnerability of every U.S. Census tract.

• SVI ranks the tracts on 15 social factors, including unemployment, minority status, and disability, and further groups them into four related themes.

• Each tract receives a ranking for each Census variable and for each of the four themes, as well as an overall ranking.
Evaluate Requests For Vaccine and to Inform Our Decisions About Where To Send Vaccine.

- Clinics open to all community members (in the current vaccination priority phase)
- Greater than 50% of individuals to be vaccinated will be coming from an area in top 10 census tracts based on CDC’s Social Vulnerability Index
- Clinics located in one of the top 10 census tracts based on CDC’s Social Vulnerability Index
- Clinics open to Medicaid/uninsured individuals (at least 10%) or serving high priority group (ex. Residential group homes)

*Site should not have >1000 doses on hand that will not be used in next 5 days*
You will have a spot to take your shot.

A vaccine will be available to all who are eligible and want it. Since supplies will be limited at first, vaccine will be prioritized through a phased approach:

**Phase 1a:**
Healthcare personnel and congregate care staff and residents.

**Phase 1b:**
Frontline essential workers and those aged 65+.

**Phase 1c:**
Those persons aged 16 to 64 years with medical conditions that increase the risk for severe COVID-19, and other essential workers.

**Phase 2:**
Larger number of vaccines are available. The rest of the population.

Group recommendations may change, depending on the vaccines available, supply, and disease spread in the community.

Countywide voice for health equity and access for DuPage County residents ensuring that all residents of DuPage County reach the highest level of health possible.

Initial focus on reducing the disproportionate impact of COVID-19 in communities and groups most affected by the pandemic, incorporating efforts into the work of Impact DuPage.

Active since October 2020

Steering Committee with >40 representatives of communities/organizations representing Black, Latinx, Asian, Islamic, and other racial/ethnic/faith minority populations

Current priorities: multilingual COVID-19 vaccine survey to assess hesitancy and build confidence; recruiting Health Ambassadors for PSAs, interviews, townhall meetings, etc.
