April 14, 2017
FOR IMMEDIATE RELEASE

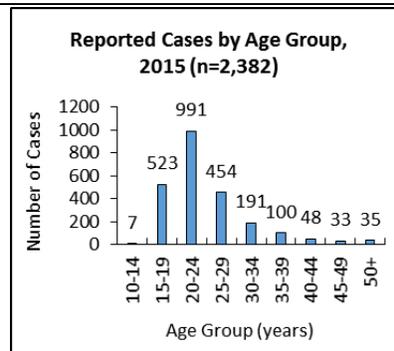

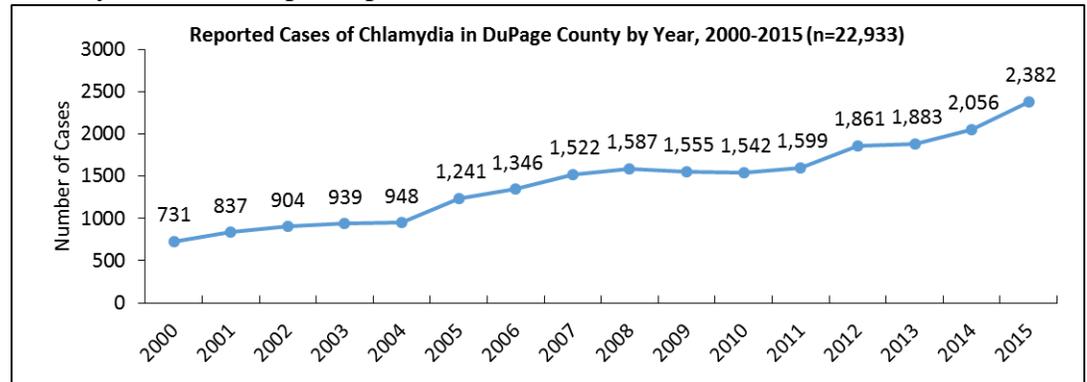

**Don't Wait 'til It Hurts.
 April is STD Awareness Month – Get Tested.**

DUPAGE COUNTY—Cases of reported sexually transmitted diseases (STDs) syphilis, chlamydia and gonorrhea have risen dramatically in DuPage County since 2000. The Centers for Disease Control and Prevention (CDC) report that syphilis, once nearing elimination, is thriving.

April is STD Awareness Month. The DuPage County Health Department (DCHD) recommends that all sexually active people protect themselves from getting STDs.

The following statistics represent a dramatic increase in the number of cases from 2000 to 2015 in DuPage County:

- Early syphilis – 42, up 425 percent
- Gonorrhea – 307, up of 50 percent
- Chlamydia – 2,382, up 226 percent

Established in 1945, DuPage County Health Department promotes physical and emotional health; prevents illness injury and disability; protects health from environmental risk factors, and strives to assure the provision of accessible, quality service.

- Page 2-

Chlamydia is the most common notifiable disease in the U.S. as well as in Illinois and DuPage County. Young persons aged 15-24 years represent 64 percent of reported chlamydia cases. The chlamydia case rate for DuPage County females is more than twice the rate for males (352.7 cases per 100,000 population vs. 161.1 per 100,000).

Testing for STDs is important because most STDs do not produce signs or symptoms initially. Prompt treatment is essential to reduce the chance of spreading the disease and eliminate the health consequences that may occur.

Prevention is also critical. In addition to screening of sexually active persons and their partners, the most reliable way to avoid transmission of STDs is to abstain from sexual contact (i.e., oral, vaginal, or anal sex) or to be in a long-term, mutually monogamous relationship with an uninfected partner. Condoms, when used consistently and correctly, can reduce the risk of transmission of STDs. For information on “Talking with Your Teens about Sex: Going Beyond ‘the Talk,’” see: www.cdc.gov/healthyouth/protective/pdf/talking_teens.pdf.

Individuals who are sexually active should talk with their physician to see what testing is right for them. The DuPage County Health Department’s STD Clinic also offers confidential testing, diagnosis, treatment and prevention counseling for syphilis, chlamydia and gonorrhea. The clinic also provides testing and treatment referrals for HIV and Hepatitis C, and evaluation and treatment for human papillomavirus (HPV)-related conditions. STD testing is confidential. For persons under 18 years, testing is free. DCHD STD services are available by appointment, with walk-ins welcome, at these locations:

Central Public Health Center

111 North County Farm Road
Wheaton, IL 60187

Mondays from 2:00 p.m. – 7:00 p.m.

Southeast Public Health Center

422 North Cass Avenue
Westmont, IL 60559

Third and Fourth Tuesday of each month, 1:00 p.m. – 4:30 p.m.

For more information, see www.cdc.gov/std/ and www.dph.illinois.gov/topics-services/diseases-and-conditions/infectious-diseases/stds. For questions, concerns or to schedule an appointment in STD Clinic, call the DuPage County Health Department at (630) 682-7400.
